PROJECTS

Realtime sign language conversion

Mentor: Dr.Hema N | Team Size: 4

Key Skills: Python, OpenCV, Convolutional Neural Network (CNN)

Domain: Computer Vision & Deep Learning

Designed and developed a real-time system to convert sign language gestures into text for assisting hearing-impaired individuals.

Captured hand gestures using a camera and processed images using OpenCV.

Performed image preprocessing including resizing, grayscale conversion, noise removal, and segmentation.

Implemented a Convolutional Neural Network (CNN) for gesture classification and prediction. Achieved accurate real-time gesture recognition through optimized preprocessing and model training.
